Rahul Dhiman

Machine Learning Engineer | Python | Deep Learning | NLP | Computer Vision

Mohali, Punjab, India | +91-8894084509 | torahul12091@gmail.com | linkedin.com/in/raahuldhimanofficial | github.com/raahuldhiman-dev | raahuldhiman-dev.github.io

PROFESSIONAL SUMMARY

Machine Learning Engineer with 5+ years of software development experience and an MCA specializing in Artificial Intelligence and Machine Learning. Builds end-to-end ML applications: LSTM time-series forecasting, computer vision on Amazon Rekognition, NLP and LLM-based systems, served through Python APIs and web apps. Brings strong back-end engineering (Python, Laravel, SQL) to take models from experiment to a usable product. Open to remote roles.

TECHNICAL SKILLS

Machine Learning: Machine Learning, Deep Learning (LSTM), Time-Series Forecasting, NLP, Sentiment Analysis, Computer Vision (Amazon Rekognition), Model Evaluation, Data Cleaning and Preprocessing, Statistical Analysis

ML Libraries and Tools: TensorFlow, Keras, scikit-learn, pandas, NumPy, Matplotlib, Streamlit, yfinance, Jupyter

Languages: Python, SQL, PHP, JavaScript, TypeScript

LLM and Serving: GPT-4, OpenAI API, LangChain, RAG, ChromaDB, FastAPI, Flask, REST APIs

Cloud and DevOps: Amazon Web Services (AWS: S3, DynamoDB, Rekognition), Google Cloud Platform (GCP), Oracle Cloud Infrastructure (OCI), Microsoft Azure, Cloudflare, Docker, GitHub Actions (CI/CD), Git

Databases: MySQL, PostgreSQL, Redis, SQLite

PROFESSIONAL EXPERIENCE

Software Engineer (Full Stack, AI Integration), Softweaver Technologies (SWT) Mar 2025 - Present
Mohali, Punjab, India

- Integrate AI/ML APIs and third-party services into existing product pipelines.
- Design and develop software infrastructure for web platforms using PHP, Laravel and JavaScript frameworks.
- Contribute to architecture decisions, system design reviews and code quality standards.
- Collaborate with cross-functional teams on product delivery in an agile environment.

Full Stack Engineer (Laravel, PHP, React), Kwan Network Solutions Aug 2023 - Mar 2025
Sahibzada Ajit Singh Nagar, Punjab, India

- Designed and optimized MySQL database schemas for high-traffic applications.
- Developed and maintained PHP/Laravel back ends and integrated REST APIs and third-party services.

Full Stack Engineer, Canvas Craft Media Aug 2022 - Aug 2023
Sahibzada Ajit Singh Nagar, Punjab, India

- Delivered multiple client web projects in parallel in a fast-paced agency environment.

PHP Developer (Laravel, JavaScript), WorksDelight Feb 2022 - Aug 2022
Mohali, Punjab, India

- Built and maintained PHP/Laravel (MVC) applications and delivered features under tight deadlines with code review and version control.

PROJECTS

Stock Price Predictor (LSTM) | github.com/raahuldhiman-dev/stock-price-predictor

Tech: Python, TensorFlow, Keras, pandas, NumPy, scikit-learn, Matplotlib, Streamlit, yfinance

- Developed an LSTM deep learning model for time-series stock price forecasting, with data download, normalization, training, prediction and actual-vs-predicted visualization.
- Delivered both a Streamlit web app and a script-based workflow for reproducible training and next-day price prediction.

AWS Face Recognition and Data Analysis System | github.com/raahuldhiman-dev/aws-face-detection-with-aws-s3

Tech: Python, Flask, Amazon Rekognition, Amazon S3, DynamoDB, boto3, AWS Lambda

- Built real-time face detection and person registration on Amazon Rekognition, DynamoDB and S3 with a Flask web interface, structured logging and health monitoring.
- Added a used-car price analysis pipeline covering data cleaning, outlier detection, statistical analysis, visualization and automated reporting.

RAG Chatbot (Open Source) | github.com/raahuldhiman-dev/rag-chatbot

Tech: Python, FastAPI, ChromaDB, OpenAI, Gemini, Claude, Groq, Ollama, OAuth, Docker, GitHub Actions

- Built a multi-tenant Retrieval-Augmented Generation (RAG) document Q&A app: token-aware chunking, per-user ChromaDB semantic retrieval, and grounded answers with source citations.
- Implemented automatic LLM provider failover (OpenAI, Gemini, Claude, Groq, Ollama) on quota errors, plus long-term memory and rolling conversation summaries.
- Secured the app with Google/GitHub OAuth, per-account data isolation and Fernet-encrypted API keys; containerized with Docker and CI via GitHub Actions.

Personal AI Assistant (In Development) | github.com/raahuldhiman-dev/voice-ai-assistant

Tech: Python, GPT-4 (OpenAI API), Speech Recognition, Text-to-Speech, FastAPI

- Building a voice-enabled personal assistant that combines speech recognition input, GPT-4 responses and text-to-speech output, with task automation and conversational memory.

EDUCATION

Master of Computer Applications (MCA), Artificial Intelligence & Machine Learning, Amity University Online — Mar 2024 - Apr 2026

Bachelor of Computer Applications (BCA), Himachal Pradesh University — 2018 - 2021
